Objective

Self-taught front-end developer who works primarily with JavaScript and related frameworks. Particularly interested in User experience research and User interface design, and enjoy having input on all aspects of a project as suits my diverse skill set. Experience in transforming graphic designers' static prototypes into hand-coded HTML5, specifically emphasizing accuracy and efficiency; adhering to W3C web standards; and maintaining cross-browser and cross-platform compatibility. Looking to work where I can bring immediate value and develop my skill-set further.

Experience

[24]7.ai / Digital Interaction Advisor

JANUARY 2018 - APRIL 2019, BANGALORE
